I. <u>PROGRAM OBJECTIVES</u>: Describe what the program is designed to achieve and explain how it is structured in order to accomplish the objectives.

The objective of the Bachelor of Science in Health Information Management program is to prepare students with the knowledge, technical skills, and work habits to be an innovative and adaptable critical thinkers and problem solvers. Individuals that possess these qualities are capable of using available services and technologies to support operations, management, and decision-making initiatives within the health information field. The curriculum encourages lifelong learning and addresses the evolving professional skills of baccalaureate degree students.

In addition to the discipline-specific outcomes, general education literacies and professional competencies are integrated throughout the academic program.

II. <u>PROGRAM STRUCTURE</u>: List all courses in the program. Indicate course name, course number, and number of credit hours or clock hours for each course.
